

Dear all,

Please join us in welcoming **Deborah Grantz** to [the](#) Hematology-Oncology Division as our new Division Manager beginning Wednesday, May 1, 2019!

Deb has been with UC for over 26 years, most recently as the [Division Manager](#) for multiple DOM divisions at ZSFG (Pulmonary & Critical Care Medicine, and Cardiology/Clinical Pharmacy). Deb will continue to share some of her time with ZSFG for the month of May to assist with the transition.

Deb is well versed in financial management and has been responsible for the administration of both domestic and international research and public service sponsored projects. She has worked closely with faculty to set up policies and procedures to monitor several research sites in Vietnam, the Philippines, and Tanzania to ensure compliance with local and UCSF policies, as well as funders' guidelines. Additionally, she has extensive experience in academic affairs, staff engagement and development, and clinical operations. Both Tom and I had the opportunity to meet Deb during the interview process and were highly impressed with her positive "can-do" attitude and problem-solving mindset; she received rave reviews from previous faculty members with whom she's worked.

In her time outside work, Deb loves to cook, see theater, read, and travel. In the spring and summer, she can be found cycling through Napa, Sonoma, and Monterey on the weekends. Last summer, she and friends went on a cycling tour in Ireland, and this September she'll be cycling through Tuscany.

We are grateful to Kelly McNeill for her fantastic service to our Division, and wish her the best of success in her new role as Department Manager for Pathology. Kelly's last official day with us will be Tuesday, April 30.

When you have time, please stop by Deb's workstation located at MZ 1600 Divisadero in B712, and say hello!

Sincerely,

Andrew Ko and Tom Martin
